FABULOUS ME!

I love working with people and have always been a team player. I grew up with 4 brothers and sports have always been a big part of my life at home, school and university. Photography became a hobby of mine while I was at school, studying art for GSCE.

It was a solitary activity and being in the dark room quietly developing photographs was a world away from my usual life being surrounded by people and noise. Fashion photography became of interest to me as a field where these two sides of myself could meet. In my final year at university I used fine art and textiles in my final project and a lot of my research led me to the boom of haute couture photography last century. I loved how the fast paced world of fashion combined with my passion for photography.

My job history demonstrates skills in customer relations and communication as well as being an adaptable and dependable employee. I hope to work for myself in the future. I have gained a great deal of work experience both during university and after but I am a firm believer you should never stop learning.

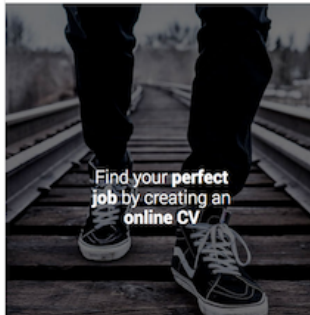

I work with some inspiring people who can teach me a lot from their experience and in the ever-changing world of fashion there is no time to rest on my laurels.
